

# Package: cells (via r-universe)

August 19, 2024

**Title** Grid Logic

**Version** 0.0.0.9000

**Description** Grid logic for rasters. Grid logic involves a rectangular extent and a 'grain', the discretization of that extent into rectangular cells. This logic exists in several packages but here is intended to be completely independent of data usage.

**License** GPL-3

**Encoding** UTF-8

**LazyData** true

**Roxygen** list(markdown = TRUE)

**RoxygenNote** 7.1.0
